THE HEART OF ASIA

18 March 2011

Dear Agents,

**RE: Japan's Earthquake - Nuclear Radiation Crisis**

After the earthquake that had struck Japan last Friday, Taiwan Atomic Energy Council has made an announcement that they would strengthen the monitoring of the level of radiation exposure to the environment. As of current, the air quality stays within the healthy range. In view of this, we would like to assure everyone that Taiwan is not being affected and is absolutely safe for traveling. Will inform everyone if any updates news about the safety issue.

Hence, please be reassured the business or holidays plans for your customers and we look forward to seeing everyone in Taiwan soon!

For more information, please do not hesitate to contact Taiwan Visitors Association at +603-20706789 or email [tva@streamyx.com](mailto:tva@streamyx.com).

Yours sincerely,

張富南
